HOW OFTEN SHOULD I DO IT?

To get great results, participate in Group Core one to three times per week, with a rest day between classes. Group Core will fatigue your core muscles, so any type of strength or resistance training should not be done right after. If you are up for the challenge, you can always add Group Core before or after a cardio workout.

HOW WILL I FEEL?

Group Core includes the latest athletic and functional training exercises. Some of the movements will be new to you. As you attend Group Core more often, you'll learn how to execute the movements better and better. Allow yourself to be a student; learn the movements and how to effectively move through space. This is an important part of functional training.

During your first few classes you may not execute some of the movements properly – this is normal, you are in learning mode. You might experience fatigue in muscles outside of the core muscles, like the shoulders and the hips – this is normal, your support muscles have to get stronger to be able to train your core well. You might experience lower back fatigue – this is normal, your lower back is a group of muscles that should be trained just like the muscles on the front side of the core. You might feel rushed – this is normal, 30 minutes goes fast and Group Core is action packed with a ton of exercises.

By the end you'll feel like the 30 minutes went by in the blink of an eye and that you got a great total body workout that finished with a great abs workout!
